MCKAY
CAREER TRAINING

Program Components

MEDICAL

Anatomy and Physiology/Terminology

- Students will learn twelve units of anatomical systems and with each system is taught anatomy, physiology and pathological conditions and abbreviations associated with each unit.
- Medical terminology is introduced to students by learning common prefixes, suffixes and root words of medical terms.
- Advanced terminology will challenge the students with speciality-specific terms.
- Advanced medical terminology.

Red Cross Standard First Aid

Emergency Cardiac Care Program, Basic Life Support Level C with Debrillator.

Patient Psychology

- Basic psychology theories and methods relevant to patient care are introduced to the students.
- Students gain an understanding of human needs, types of personalities and how to communicate with people of different health levels.

Medical Ethics & Law

- Introduces students to the difference between ethics and laws as it relates to the responsibilities and ethics of medical administrative assistants.

ADMINISTRATIVE

Office Procedures

- An extensive class that deals with the specific skills that prepare the Medical Administrative Assistant to be highly successful in their field.
- A simulation lab is used to give students a chance to put their knowledge to practical use. The management course expands these basics.
- Along with these elements, health care specific "Job Search" will be presented.

Management Fundamentals

- Students will learn conflict resolution, time and stress management, leadership, communications and ethics that are presented in a logical, practical manner.

Bookkeeping

- The language and concepts of bookkeeping are taught first. Students are then instructed how to put the information to practical use by using a computerized accounting program.

APPLICATIONS

- Microsoft Office - introductory and advanced. The advanced class builds upon the basic skills and expands the student's knowledge of Word, Excel, Access and Power Point.
- SAGE 50 Accounting - An asset to the bookkeeping class offering the fundamentals of computerized accounting in a practical hands-on and scheduling.
- Computerized billing procedures using Accuro.
- Keyboarding - Students will type every day throughout the entire course with the objective of reaching a minimum of 55 words per minute.
- Medical Transcription - introductory and advanced - students must transcribe a mixture of reports from a variety of doctors with different accents, increasing the difficulty level.
- Paperless Office Applications - introduces students to paperless office concepts.

BUSINESS COMMUNICATIONS

Grammar

- The main topics covered are vocabulary, spelling, eight parts of speech and effective sentence structure.
- Students will apply their grammar skills to learn the basic writing and communication skills necessary to be successful in the health care field.

Proofreading and Editing

- An asset of skills are gained to develop accuracy and excellence in business writing.
- This class reviews the grammar rules enabling students to apply them to realistic situations.
- Communications

Human Relations

- A class focusing on the importance of work ethics
- Students will have a better understanding of themselves and others
- Proper communications are studied, as well as the dynamics needed when working with co-workers and employers to be successful
- Motivating others and learning positive skills
- Becoming an effective leader and team building skills
